ПОЯСНИТЕЛЬНАЯ ЗАПИСКА

Методические рекомендации к выполнению практических работ по дисциплине «Иностранный язык» предназначены для организации работы студентов первого курса очного отделения по специальности 38.02.01 Экономика и бухгалтерский учет (по отраслям).

Согласно учебного плана обязательная аудиторная учебная нагрузка составляет 117 часов, в том числе 117 часов составляют практические занятия. В связи с практической направленностью дисциплины разработано 36 практических работ, по 2-4 часа на каждую в зависимости от объема изучаемого материала.

Практические работы позволяют закрепить, систематизировать и определить уровень знаний и умений.

Содержание программы дисциплины «Иностранный язык» направлено на достижение следующих целей:

- формирование представлений об английском языке как о языке международного общения и средстве приобщения к ценностям мировой культуры и национальных культур;
- формирование коммуникативной компетенции, позволяющей свободно общаться на английском языке в различных формах и на различные темы, в том числе в сфере профессиональной деятельности, с учетом приобретенного словарного запаса, а также условий, мотивов и целей общения;
- формирование и развитие всех компонентов коммуникативной компетенции: лингвистической, социолингвистической, дискурсивной, социокультурной, социальной, стратегической и предметной;
- воспитание личности, способной и желающей участвовать в общении на межкультурном уровне;
- воспитание уважительного отношения к другим культурам и социальным субкультурам.

КРИТЕРИИ ОЦЕНИВАНИЯ

Критерии оценки выполнения фонетических, лексических и грамматических упражнений (тестов)

Отметка «5» Задания выполнены на 90-100%

Отметка «4» Задания выполнены на 75-89%

Отметка «3» Задания выполнены на 50-74%

Отметка «2» Задания выполнены менее чем на 50%

Критерии оценки письменных развернутых ответов

Отметка «5» Коммуникативная задача решена полностью, применение лексики адекватно коммуникативной задаче, грамматические ошибки либо отсутствуют, либо не препятствуют решению коммуникативной задачи

Отметка «4» Коммуникативная задача решена полностью, но понимание текста незначительно затруднено наличием грамматических и/или лексических ошибок.

Отметка «3» Коммуникативная задача решена, но понимание текста затруднено наличием грубых грамматических ошибок или неадекватным употреблением лексики.

Отметка «2» Коммуникативная задача не решена ввиду большого количества лексико-грамматических ошибок или недостаточного объема текста.

Критерии оценки техники чтения

«5» Речь воспринимается легко: необоснованные паузы отсутствуют; фразовое ударение и интонационные контуры, произношение слов практически без нарушений нормы; допускается не более 2-х фонетических ошибок;

«4» Речь воспринимается достаточно легко, однако присутствуют необоснованные паузы; фразовое ударение и интонационные контуры практически без нарушений нормы; допускается от 3 до 5 фонетических ошибок, в том числе 1-2 ошибки, искажающие смысл;

«2» Речь не воспринимается из-за необоснованных пауз; неправильных фразовых ударений и искаженных интонационных контуров И\ИЛИ 8 и более фонетических ошибок.

Критерии оценки перевода текста

Оценка «отлично»

Перевод полный, без пропусков и произвольных сокращений текста оригинала, не содержит фактических ошибок. Терминология использована правильно.

Перевод отвечает системно-языковым нормам и стилю языка перевода.

Адекватно переданы культурные и функциональные параметры исходного текста.

Допускаются некоторые погрешности в форме предъявления перевода.

Оценка «хорошо»

Перевод полный, без пропусков и произвольных сокращений текста оригинала, допускается одна фактическая ошибка, при условии отсутствия потерь информации и стилистических погрешностей на других фрагментах текста.

Имеются несущественные погрешности в использовании терминологии.

Перевод в достаточной степени отвечает системно-языковым нормам и стилю языка перевода.

Культурные и функциональные параметры исходного текста в основном адекватно переданы.

Коммуникативное задание реализовано, но недостаточно оптимально.

Допускаются некоторые нарушения в форме предъявления перевода.

Оценка «удовлетворительно»

Перевод содержит фактические ошибки.

Низкая коммуникативность и плохая «читабельность» текста затрудняют его понимание рецептором.

При переводе терминологического аппарата не соблюден принцип единообразия.

В переводе нарушены системно-языковые нормы и стиль языка перевода.

Неадекватно решены проблемы реализации коммуникативного задания.

Имеются нарушения в форме предъявления перевода.

Оценка «неудовлетворительно»

Перевод содержит много фактических ошибок.

Нарушена полнота перевода, его эквивалентность и адекватность.

В переводе грубо нарушены системно-языковые нормы и стиль языка перевода.

Коммуникативное задание не выполнено.

Грубые нарушения в форме предъявления перевода.

Критерии оценки монологического и диалогического высказываний:

«5»

Соблюден объем высказывания. Высказывание соответствует теме, отражены все аспекты, указанные в задании, стилевое оформление речи соответствует типу задания, аргументация на уровне, нормы вежливости соблюдены.

Адекватная естественная реакция на реплики собеседника. Проявляется речевая инициатива для решения поставленных коммуникативных задач.

Лексика адекватна поставленной задаче и требованиям данного года обучения языку.

Использованы разные грамматические конструкции в соответствии с задачей и требованиям данного года обучения языку. Редкие грамматические ошибки не мешают коммуникации.

Речь звучит в естественном темпе, нет грубых фонетических ошибок.

«4»

Не полный объем высказывания. Высказывание соответствует теме; не отражены некоторые аспекты, указанные в задании, стилевое оформление речи соответствует типу задания, аргументация не всегда на соответствующем уровне, но нормы вежливости соблюдены.

Коммуникация немного затруднена.

Лексические ошибки незначительно влияют на восприятие речи учащегося.

Грамматические незначительно влияют на восприятие речи учащегося.

Речь иногда неоправданно паузирована. В отдельных словах допускаются фонетические ошибки (замена, английских фонем сходными русскими). Общая интонация обусловлена влиянием родного языка.

«3»

Незначительный объем высказывания, которое не в полной мере соответствует теме; не отражены некоторые аспекты, указанные в задании, стилевое оформление речи не в полной мере соответствует типу задания, аргументация не на соответствующем уровне, нормы вежливости не соблюдены.

Коммуникация существенно затруднена, учащийся не проявляет речевой инициативы.

Учащийся делает большое количество грубых лексических ошибок.

Учащийся делает большое количество грубых грамматических ошибок.

Речь воспринимается с трудом из-за большого количества фонетических ошибок. Интонация обусловлена влиянием родного языка.

«2»

Учащийся не понимает смысла задания. Аспекты указанные в задании не учтены.

Коммуникативная задача не решена.

Учащийся не может построить высказывание. Учащийся не может грамматически верно построить высказывание. Речь понять не возможно.

Студент должен

знать: слова по теме «Семья», местоимения личные, притяжательные, указательные, возвратные

уметь: применить слова по теме в рассказе о своей семье, применять в предложениях местоимения личные, притяжательные, указательные, возвратные

ХОД ЗАНЯТИЯ

1. Practise the following words from the text:

household- семья, домашнее хозяйство

generation-поколение

to share-делить

dream-мечта

hope-надежда

possession-собственность

to respect- уважать

dignity-чувство собственного достоинства

valuable-значимый, ценный

to cheat- обманывать

to bridge-наводить мосты, преодолевать препятствия

generation gap- конфликт между поколениями

agreement- соглашение

protection- защита

dweller- обитатель, жилец

2. Read and translate these words combinations:

an essential part of the society, according to researches, four generations, for comfort and protection, to respect dwellers, to enjoy dignity, in an extended family, to be very valuable for somebody, to cheat teenagers, to bridge the generation gap, to come to an agreement, hopes and possessions.

3. Read and translate the text:

Family and Family Problems

A family is an essential part of our society. A family is a little world. According to researches, households of three or even four generations will become typical.

Firstly a family has things shared together like dreams, hopes and possessions. I think it is great.

Besides, we need a family for comfort and protection.

Secondly a family is a place where they respect dwellers, a place where all members can enjoy the dignity of their own. Some people say that privacy is impossible in an extended family. But in my opinion trust is more important for a happy family than any other feature.

There are a lot of problems in an extended family, especially between brothers and sisters. They always treat one another badly. Of course, if you have a lot of brothers and sisters, there will be no privacy. But on the other hand, when you have no brothers or sisters, life becomes boring.

There a lot of problems and conflicts that appear between teenagers and their parents. They don't understand each other.

Parents always want their children to be clever and learn harder. They don't bother themselves to understand their children. They are always glad when their children have trouble with things that are very valuable for them.

Parents always cheat teenagers...They say that college is very important for us and to enter university we should have good marks in our diplomas.

But it's not what the children want. I think that it is necessary to bridge the generation gap, and children and parents must come to an agreement.

4. Answer the following questions:

1. What is a generation gap? 2. How should we overcome it? 3. What family is extended? 4. Do you agree that an extended family is better? 5. Is your family an extended one or not? 6. What problems are there in an extended family? 7. Do you agree that parents often cheat you? 8. Do you think that college diploma with good results is important?

5. Give a short summary of the text.

6. Read the dialogue, act it and be ready to express your opinion:

A.: Do you think that having a family is important for a person?

B.: I think it is very important.

A.: Why is it so important?

B.: I think only in a family a person can develop to be a person.

A.: I also think that one's family is the place where a person can get support and understanding. Even if the whole world is against me, my family supports me. And I think that support and understanding are very important.

B.: I think so too.

A.: I also think that a family is so important because children learn how to behave at home, in the family circle. Mothers are our first teachers. Do you agree with this?

B :Yes, I do. I believe that the family and especially mothers give us the love we need. When we feel bad, tired and exhausted, we come to our mothers.

A.: True. But there is another important moment in the question of a family. It is learning to care after somebody, to care for somebody. When we are young, we accept care of our parents and so

learn to care for them and other people. Isn't it so?

B.: I think it is. It is also known that children try to copy or to avoid the relationships they had in the family when they were young. If they felt at ease with their parents, they will try to copy their parents' relationships. If they felt uncomfortable, they can even deny all relationships, don't want to marry and have children.

A.: I also think it is important if you are proud of your parents. In this case you want them to be proud of you and do your best to achieve the results they expect you to achieve.

B.: I think that's right.

A.: Another important thing is that a family makes you feel you are not alone. You are never lonely in a good family.

B.: I want to add that we learnt to be parents looking at our parents. There are no schools where people are taught to be parents. They learn it in their families.

A.: So there are many reasons why our families are so important for us.

MY WORKING DAY

On weekdays I usually get up **nearly** six o'clock. I do not like to get up early, but I have to, because I have a lot of work to do **during** the day.

I make my bed, wash my face, put my clothes on and go to the kitchen to have breakfast. My mother usually prepares breakfast for me, but sometimes I do it myself. If I **prepare** my breakfast for my own, I should have to get up earlier. I do not like big breakfasts; I **prefer** a cup of coffee and a sandwich.

Then I go to school. It is rather far from my house and I go there by bus. It takes me 15 minutes to get there by bus. I have classes **till** two or three o'clock, it **depends** on a week day. Then I come home and have dinner. I like a big dinner, because when I come home from school I am **hungry**.

After my dinner, I have a rest for **a couple** of hours and then I do my homework. If I have some **spare** time I do some work about the house. I **sweep** the floor, **wipe** the **dust** off the furniture and clean the **carpets** with the **vacuum-cleaner**. Sometimes my mother asks me to go shopping.

When I have free time I go for a walk with my friends or watch TV, or read books or play my favourite computer games. Then I have supper with my family. I like evenings very much, all members of our family get together after work and have the **opportunity** to talk and to discuss our family **affairs**.

Twice a week I go to the swimming-pool. As a rule, I haven't much time on my weekdays.

I usually go to bed at about eleven o'clock, sometimes at **midnight**.

British people spend their free time in a lot of different ways. They do sport, they watch sport, they visit interesting places, and they have hobbies. Have you tried any of these?

What do you do in your free time? I like to watch television and listen to music a lot. But I do go on the Internet as well. I like to skateboard and rollerblade in my free time. I play rugby in my free time for Oxford Rugby Club. And I also play tennis. In my free time I usually play sport, which is usually tennis if the weather is nice or swimming.

I like playing rugby. I'm a member of a rugby team. I like swimming, playing tennis and football. I play football for a football team. I play a lot of tennis as well. I play rugby or cricket, or go sailing. I play sport, go into town, see my friends. In my free time I go to a drama group and a dance group.

So what are the top ten leisure activities in Britain? The most popular activity for British people outside their own home is ... going to the pub. Over the last ten or twenty years pubs have changed a lot.

People don't just go to the pub for a drink. Almost all pubs serve meals nowadays and many pubs have live music, karaoke competitions and quiz nights. The second most popular activity is going to a restaurant. And the third?

Young people, especially, like going out for fast food. The number of fast food restaurants in Britain has increased about 10 times since 1982. And after fast food? The fourth most popular activity is ... going to the library. Surprisingly, this is more popular than going to the cinema... although the number of people going to the cinema has almost doubled since 1980, and the number of cinemas has more than doubled, too.

Many people visit historic buildings. This is Kingston Lacey, a beautiful seventeenth century house with lovely gardens. Nearby is Corfe Castle. It is over one thousand years old and full of history. Short break holidays both abroad and in Britain are very popular. A lot of young people go to discos and nightclubs. And, of course, watching sport is a big free time activity.

Favourite sports include football ... horseracing ... and cricket, a traditional English sport. Art galleries and museums are popular, too. This is the Ashmolean Museum in Oxford. The Ashmolean is the oldest museum in Britain and has been part of the University of Oxford since 1683. They have a wonderful collection here including these beautiful sculptures. 200,000 people visit this museum every year. Like many museums in Britain, admission is free

What other places do people like to visit? Almost 3 million people visit Alton Towers every year. This ride is called Nemesis. And this one is called Oblivion. Then there's Madame Tussaud's ... the Tower of London... Legoland ... and the London Eye. The London Eye opened in March 2000 and is one of London's most popular attractions.

But what do the British do at home in their free time? Well, listening to the radio or to CDs is popular. So is reading. And people spend a lot of time visiting or entertaining their friends and family. But the most popular activity? You've guessed it. It's watching TV.

Today Alexander and his foreign friends are going to the rock concert “Music, help!” in the Polytechnic Museum. Alex lives on the outskirts of Moscow. He does not know how to get to this place, so he asks his father:

Dad, can you tell me the way to the Polytechnic Museum? How can I get there quickly? Sure. It’s situated in the very centre of Moscow. Take the metro and get off at the Lubyanka station. Then go up the stairs to the street. There is a square opposite the exit, called Novaya Ploshchad. The Polytechnic Museum is a big long building just in front of you. Go straight across the Square. It is behind the bus stop. Thanks, Dad.

Alexander goes to the local metro station. He leaves the entrance to his block of flats, walks along the side street, turns left and then right. It takes him only a ten-minute walk to get to the metro station. Alex goes down the stairs and takes a train. In forty minutes he is at the Lubyanka station. He turns left to the escalator. Today the station is not so crowded. He goes up. He sees the old building of the Polytechnic Museum across the square and walks straight towards it. At the crossroads next to the Museum he meets with his friends – Peter, Jane and Nora. They are glad to see Alex. They come into Museum hall. The concert starts in a quarter of an hour.

At My College

Alexei is going to leave school in a year, but he realizes that he must start thinking about further education right now, because it is essential to read for the exams well beforehand. So he asks his brother to tell him about his college and advise.

Alexei: Vlad, I want to ask you about college life. Is it different from school life?

Vlad: Well, it depends on what you are interested in. We, too, in college have lessons, and marks; teachers give us homework, and there are examinations and tests.

Alexei: Well, I see. But, then, is there any difference between a school and a college/

Vlad: Why, of course. First, at college we have special subjects in our curriculum. For example, if one is going to be a technician he or she will take physics, mathematics, programming and a lot of other things. It's really very interesting. Second, if you work regularly, attend all the lectures and seminars, and get good marks, you will be given a scholarship. If you are at the top of the group, and have excellent marks, the scholarship will be higher,

Alexei: It sounds very nice, I must say. Now, please, describe your usual day at college.

Vlad: Well, our day starts at half past eight. We have several lectures and seminars every day, and work in workshops. Students also can stay at college after classes to do research.

Alexei: How are students assessed

Vlad: We have exams and credit tests twice a year. But of course, it is important how you work during the year.

Alexei: What is the difference between an exam and a credit test?

Vlad: Well, you get marks for an exam, and when you take credit test, you'll get a «pass». Exams are usually taken at the end of the course of a subject. For example, if you take chemistry for a year and a half, you will have credit tests in chemistry at the end of two terms, and at the end of the third term you will take an exam.

Alexei: Is an exam more difficult, than a credit test?

Vlad: Not really. In fact, you have more time to read for an exam: you are given from two to five

days to get ready, and you are not given a lot of time to get ready for a credit test. In general, it depends on the subject.

Alexei: Well, I see. Now, what about holidays? They are not the same as at school, are they?

Vlad: We have holidays only two times a year: two weeks in January and two months in summer.

Alexei: Vlad, what are you going to do after you graduate?

Vlad: There is a good opportunity for those who get only excellent marks while they study. When we graduate, we can enter a university and continue our education there.

Alexei: The prospect is very nice. I wish you good luck, then. Do you advise me to enter this college, too?

Vlad: You know, it's up to you to decide. But I like my studies there, and I think I have made the right choice. Besides, I've got many friends in the college, and friendship is the best thing in the world!

Shopping

When we want to buy something, we go to a shop. There are many kinds of shops in every town or city, but most of them have a food supermarket, a department store, men's and women's clothing stores, grocery, a bakery and a butchery.

I like to do my shopping at big department stores and supermarkets. They sell various goods under one roof and this is very convenient. A department store, for example, true to its name, is composed of many departments: readymade clothes, fabrics, shoes, sports goods, toys, china and glass, electric appliances, cosmetics, linen, curtains, cameras, records, etc. You can buy everything you like there.

There are also escalators in big stores which take customers to different floors. The things for sale are on the counters so that they can be easily seen. In the women's clothing department you can find dresses, costumes, blouses, skirts, coats, beautiful underwear and many other things. In the men's clothing department you can choose suits, trousers, overcoats, ties, etc.

In the knitwear department one can buy sweaters, cardigans, short-sleeved and long-sleeved pullovers, woollen jackets. In the perfumery they sell face cream and powder, lipstick, lotions and shampoos.

In a food supermarket we can also buy many different things at once: sausages, fish, sugar, macaroni, flour, cereals, tea. At the butcher's there is a wide choice of meat and poultry. At the bakery you buy brown and white bread, rolls, biscuits.

Another shop we frequently go to is the greengrocery which is stocked by cabbage, potatoes, onions, cucumbers, carrots, beetroots, green peas and what not. Everything is sold here ready-weighed and packed. If you call round at a dairy you can buy milk, cream, cheese, butter and many other products.

The methods of shopping may vary. It may be a selfservice shop where the customer goes from counter to counter selecting and putting into a basket what he wishes to buy. Then he takes the basket to the check-out counter, where the prices of the purchases are added up. If it is not a self-service shop, and most small shops are not, the shop-assistant helps the customer in finding what he wants. You pay money to the cashier and he gives you back the change.

Questions:

1. What do we do when we want to buy something?
2. What kinds of shops are there in every town?
3. Where do you like to do your shopping?
4. What departments is a department store composed of?
5. Where are the things for sale?
6. What can we buy in the knitwear department?
7. What can we buy in a food supermarket?
8. What methods of shopping are there?

Visiting a supermarket

It's no wonder that out of all services (1), run for people, shop service is the most frequent. Shops are supplied with the necessary goods which people buy to keep themselves living. There are different types of shops in big cities, but lately supermarkets have become very popular.

A supermarket is a self-service (2) store offering a wide variety of food and household merchandise. It is larger in size and has a wider selection than a traditional grocery store (3). The supermarket typically comprises meat, canned goods (4) as well as various nonfood items such as housecleaning products, detergents, pet foods.

The traditional supermarket occupies a large amount of floor space, usually on a single level and is situated near a residential area in order to be convenient to consumers (5).

There is a large network of supermarkets in Russia. The most popular supermarkets are Furshet, Karavan, Rodyna, Silpo and others. As for me I usually do shopping in the Rodyna supermarket. Its popularity came about because of the excellent service and the large variety of goods for sale. There are a lot of wonderful departments to visit: breads and bakery products, dairy products and eggs, meats, fish and sea foods, canned goods, cereals (6), fruit and vegetables. The cooking department is famous for its homemade dishes, fresh salads and delicious cakes.

One of my favourite departments in the Rodyna supermarket is the department of dairy products. Here you can buy different kinds of yogurt, milk, cottage cheese, cream and sour cream. The greengrocery department sells a good variety of vegetables and fruit: potatoes, carrots, onions, cabbage, oranges and tangerines, apples, pineapples, pears, grapes.

At the meat department we can buy lean (7) and fat meat: beef, pork, veal, poultry (8).

Supermarkets usually offer products at relatively low prices. But some products such as meat, fish, poultry are sold at lower prices at the market. Of course, the cheapest place to buy goods

nowadays is the market. But you are to be careful about the quality of things there.

So, my choice is buying products at the supermarket, which is situated near my house.

2. Answer the questions

1. What do you usually buy at the shop?
2. Is there any supermarket near you home?
3. What departments are there in the nearest supermarket?
4. What is your favourite department?
- 5: What are the advantages of supermarkets?

3. Read the dialogues and translate.

1) Mum: Hello?

Amy: Hi, Mum. It's Amy. Dad and I are here at the supermarket. We've got your list, and we're doing the shopping, but we've got some questions.

Mum: No problem, Amy. What do you want to know?

Amy: We've got the crisps and biscuits for my school snacks, but Dad and I don't know what type of oil to buy.

Mum: Get olive oil. I always cook with olive oil because it's the healthiest type of oil.

Amy: Right, olive oil. Now, should we get orange juice or fizzy drinks?

Mum: Get both. We'll have orange juice for breakfast and fizzy drinks with dinner tonight.

Amy: Speaking of dinner ... you're making beef with baked beans, right?

Mum: Yes, that's right. Beef with baked beans is your dad's favorite meal. It will be ready in half an hour, so please hurry. And don't forget the carrots. I want carrots for the salad. In fact, get about half a kilo of carrots.

Amy: Right, carrots and peppers are on the list and Dad's getting them right now. What about dessert? What's for dessert?

Mum: Would you like fruit salad or watermelon?

Amy: Watermelon is a great idea! Uh, Mum, I love watermelon but I don't know how to choose a good one.

Mum: Ask your dad to show you. He knows how to choose a perfect watermelon.

Amy: Dad, can you help me choose a watermelon? Mum, we're getting the watermelon. We'll just pay and come right home.

Mum: Get some popcorn, too, so we can have popcorn and watch a film on TV after dinner.

Amy: OK. See you soon.

Mum: Bye!

Healthy Way of Life

Text 1

Food we eat also influences our health. Nowadays people are very busy and they often eat in fast food restaurants as they don't have time to cook. Fast food is unhealthy. It is very *rich in calories (fatty)* and has a lot of *additives*. This food gives a lot of energy. But if you don't work it out (израсходовать), it becomes fat in your body. The same is with chocolates, cakes and sweets. They have much fat and sugar.

People should *get rid of a habit of* eating fast food and *get into a habit of* eating *organic food* such as fruit, vegetables and fish.

There are other **bad habits**, which can *ruin our health*. It is smoking, drinking alcohol and using drugs.

Text 2

Our health depends on many things: our physical activity, the food we eat and our good and bad habits. Although a lot of people are interested in staying healthy, not many people do very much about it. Modern way of life when people have little physical activity, use cars instead of walking, watch television and work on computers for many hours is quite dangerous for their health. People's health also influences their mood.

There are many opportunities to stay healthy and be fit and one of them is **going in for sports**. But you needn't be a professional sportsman. Just **simple regular exercises** give you energy and help you feel and look better.

Exercises that involve repeated movements such as are walking, jogging or swimming are the best. Bending and stretching which are practiced in aerobics or yoga make your body flexible and light. The cheapest and most popular sport is jogging. If you don't have time for it, make small changes like using stairs instead of the lift or walking or cycling instead of taking the bus and it can help you to improve your health and make you a more active person.

Only a healthy man can enjoy his life, work well and be happy. There are proverbs "**Health is better than wealth**" and "**Early to bed and early to rise makes a man healthy, wealthy and wise**".

2. Answer the questions:

1. Why do people care about healthy way of life nowadays?
2. How does our health depend on our lifestyle?
3. What can people do to stay healthy? What do you personally do?
4. Is sport a hobby or a part of your everyday life?
5. Is sport popular in your family? Do your parents do sports regularly?
6. Why is it important to exercise every day?
7. What bad habits do you know? Why are they dangerous?

Bad habits

Bad habits

The health of a person is the main value in the life. It cannot be bought with any money! There is no price for it. Being the sick person, you cannot realize all your dreams and be successful in the modern world.

But how to be healthy, when there are a lot of fatal temptations around us? Don't begin! Don't make the first cigarette inhalation, the first sip of alcohol! Everything begins so simply, but comes to the end with a trouble.

It was said so much about the harm of smoking. For a long time it has been proved, that smoking is not only reflected on the budget of a family, pollutes air, but also ruins our health. But, in spite of all that the number of smoking people is not diminished. And what is worse, not only the teens but also the junior schoolboys begin to smoke.

I think those, who don't do his (her) best in study or school life, as a rule begin to smoke at the school age. It was proved, that there is no such organ which would not suffer from smoking. Smoking is not a harmless pastime which can be given up without efforts. It is necessary to have the will - power to stop smoking.

In addition to smoking, we can name the other fatal habit: the drinking of alcohol. Unfortunately, very often they combine with each other. Alcohol is a poison! Having penetrated into an organism, it has destroyed the brain of the person for some months. A great man said that drinking alcohol is a voluntary madness, and I think he was right. Under the influence of alcohol the person can make absolutely rash actions. The matter is that alcohol is the drug, and drugs influence on the brains of the person. Especially alcohol is very dangerous for the young because their organism is exposed to the influence of harmful substances more easily. Even a single sip of alcohol causes a poisoning which can lead to death. And the usage of drugs ... They ruin all human organs, so the drug addicts die young. Few of them live longer than several years after they have started taking drugs.

So, I consider that there is no place to these habits in our life. To my mind, only healthy people should live on our planet and then our Earth will be brighter and more beautiful, because only the healthy person will provide its further development and prosperity.

Sports in Great Britain

England is a sports-loving nation. Sports in England take many forms: organized sports, which attract huge crowds to encourage their favourite team to victory, athletic games played for recreation and others.

Some sports are called spectator sports, when the number of spectators is greater than the number of people playing in the game. Other sports are called participant, sports attracting large crowds only on special occasions such as tournaments.

The game peculiarly associated with England is cricket. Many other games too are English in origin, but have been accepted with enthusiasm in other countries; cricket has been seriously and extensively accepted only in the Commonwealth, particularly in Australia, India, Pakistan.

Cricket is slow, and a spectator, sitting in the afternoon sun after his lunch, may be excused for having a little sleep for half an hour. Cricket is making no progress in popularity. Association football or soccer is very popular. Nearly 49 million spectators each year attend matches between the great professional teams organized by the Football League. The biggest event in England is the Cup Final played at the Empire Stadium, Wembley, in a London suburb.

Rugby football is played with an egg-shaped ball which may be carried and thrown (but not forward). Rugby is played mainly by the amateurs.

The games of golf and tennis are played by great numbers of people. Golf is played in the countryside. It consists in driving a small ball towards and into holes separated by considerable distances, by means of special "golf clubs". The aim is to go round using as few strokes as possible. There are many tennis clubs, but every town provides tennis courts in public parks. The world championship tennis matches are held at Wimbledon in London, during June and July.

Next to football, the chief spectator sport in Britain is horse-racing. A lot of people are interested in the races and risk money on the horse which they think will win. Britain is also famous for motor-car racing, boat-racing, dog-racing, and even

races for donkeys. The famous boat-race between the teams of Oxford and Cambridge attracts large crowds of people.

Various forms of athletics, such as running, boxing, jumping, swimming are wide-spread in England. The English weather is not always cold enough to ski, skate, or toboggan, but winter is a good season for hunting and fishing.

Indeed sport in one form or another forms an essential part of daily life in Britain.

Summer and Winter Sports

People all over the world are very fond of sports and games. That is one of the things in which people of every nationality and class are united.

The most popular outdoor winter sports are shooting, hunting, hockey and, in the countries where the weather is frosty and there is much snow — skating, skiing and tobogganing. It's so nice to go to the skating-rink on a frosty sunny day. Some people prefer to be out of town in such weather and to sledge or to ski in the woods. Many people greatly enjoy figure-skating and ski-jumping.

Summer affords excellent opportunities for swimming, boating, yachting, cycling, gliding and many other sports. Among outdoor games football takes the first place in public interests; this game is played in all the countries of the world. The other games that have firmly established themselves in favour in different countries are cricket, volley-ball, basketball, and so on. Badminton is also very popular both with young and old.

All the year round many people indulge in boxing, wrestling, gymnastics and track and field events. Scores of young girls and women go in for calisthenics. Over the last few years aerobics has become popular with young girls and women. Aerobics helps them to be slim, healthy and strong. The interest for it greatly increased thanks to Jane Fonda, a prominent American actress, the founder of this kind of sport. This woman may serve as an impressive example of inexhaustible health, cheerfulness and beauty. Being a great enthusiast of aerobics she has been trying to initiate many women all over the world into this sport.

Among indoor games which one can go in for all the year round are billiards, table tennis, draughts, chess, of course. The results of chess tournaments are studied and discussed by enthusiasts in different countries.

So we have all grounds to say that sport is one of the things that makes people kin.

Sport in the USA

Americans are very fond of sport. The most popular sports in the USA are football, which is played from April to October, baseball, played from September to December, basketball played from October to April and ice hockey, played in most northern cities from October to March.

American football derives from the English game of rugby. It started at Harvard University in the 1870's. It is a game for two teams of eleven men on the field. The object of the game is to have the control of the ball and to score points by carrying it across the goal-line.

Baseball is a team game derived from the English game of cricket. It is played with a bat and ball by two teams of nine players each, on a field with four bases. Baseball is the national game in the USA and it is very popular in Canada too.

Basketball is a game which nowadays is popular all over the world. It was invented in 1891. During the 20's the first US league championship was organized. In the 70's the American Championship was divided into two leagues: the ABA (American Basketball Association), which does not exist any longer and which played with a blue, red and white ball and the NBA (National Basketball Association).

The NBA is a professional league which still plays.

There are more activities which Americans take part in such as golf, swimming, tennis, aerobics, wrestling, etc.

Sport in the USA

Americans' interest in sports seems excessive to many foreign visitors. Television networks spend millions of dollars arranging to telecast sports events. Publications about sports sell widely. In the US professional athletes can become national heroes.

Sports are associated with educational institutions in a way is unique. High schools have coaches as faculty members, and school teams compete with each other.

Nowhere else in the world are sports associated with colleges and universities in the way they are in the States. College sports, especially football, are conducted in an atmosphere of intense excitement and pageantry. Games between teams attract nationwide television audiences.

The sport that is most popular in most parts of the world — soccer — is not well known in the US. The most popular sports are football and baseball, games that are not played in large number of countries.

Sports play such an important role in American life that the sociology of sports, sports medicine, and sports psychology have become respectable specializations.

Many Americans jog every day, or play tennis or bridge two or three times a week. They go on ski trips and hunting expeditions that require weeks of planning and organizing. In the Americans' view, all these activities are worth the discomfort they may cause because they contribute to health and physical fitness. That is probably why Americans are known as a healthy nation.

Questions:

Are Americans interested in sports?

Do professional athletes become national heroes?
Are there sport teams in high schools?
Are there any coaches in the faculty?
What are the most popular sports in the USA?
What specializations have become respectable thanks sport?
Why do Americans spend so much time on sport activities?

Vocabulary:

abroad - за границей
all over the world - во всём мире
different - разные
way of life - образ жизни
musical rhythms - музыкальные ритмы
shop window - витрина магазина
city-dweller – горожанин

Millions of people all over the world spend their holidays travelling. They travel to see other countries and continents, modern cities and the ruins of ancient towns, they travel to enjoy picturesque places, or just for a change of scene. It's always interesting to discover new things, different ways of life, to meet different people, to try different food, to listen to different musical rhythms.

Those who live in the country like to go to a big city and spend their time visiting museums and art galleries, looking at shop windows and dining at exotic restaurants. City-dwellers usually like a quiet holiday by the sea or in the mountains, with nothing to do but walk and bathe and laze in the sun.

Most travellers and holiday-makers take a camera with them and take pictures of everything that interests them - the sights of a city, old churches and castles, views of mountains,

lakes, valleys, plains, waterfalls, forests; different kinds of trees, flowers and plants, animals and birds. Later, perhaps years later, they will be reminded by the photos of the happy time they have had.

People travel by train, by plane, by boat and by car. All means of travel have their advantages and disadvantages. And people choose one according to their plans and destinations.

If we are fond of travelling, we see and learn a lot of things that we can never see or learn at home, though we may read about them in books and newspapers, and see pictures of them on TV. The best way to study geography is to travel, and the best way to get to know and understand people is to meet them in their own homes.

Airline Travelling

There are three international airports in London: Heathrow, Stansted and Gatwick. Flights inside Britain are called domestic flights, so if you want to travel inside the country go to domestic Departures. At the airline desk you show your ticket and give them your luggage in the usual way.

There is also a fast, frequent plane service - the shuttle - between London Heathrow and Manchester, Glasgow, Edinburgh and Belfast. For services to other cities you should ask the airline or travel agents. Families, young people, students and other people can get some tickets cheaper (for train tickets ask about a "Rail-card"). Students also have some special offers.

If you've arrived by plane, the next thing to do is to get your luggage. Follow the signs to Baggage Reclaim and wait until you see your flight number. Keep your luggage with you till you are asked the label.

Go through the Customs. This is the place where officials may search your luggage. There are two channels (passages) for travelers. Those who have more quantity of things than it is allowed to bring must go through the red channel. They have to pay duty (special tax). People with no things to declare go through the green channel without paying duty. You can also buy some things at duty-free shops which are not taxed.

3. Fill in the blanks with the words and phrases.

1. When you travel somewhere by plane, first you go to the ..., then you go through ... until you get to the ..., where you wait until your flight is called. Then you go to ..., for example until it is time to board the plane.
2. When you arrive at an airport you first go through Then you reclaim your baggage and go through the ..., where they may check your luggage. Then on the ... you are met by friends and relatives.

Great Britain

The official name of the country is the United Kingdom of Great Britain and Northern Ireland. It occupies the territory of the British Isles. The British Isles consist of two large islands: Great Britain and Ireland and about five thousand small islands. The total area is over 244 000 square kilometres.

The United Kingdom is made up of four countries: England, Wales, Scotland and Northern Ireland. Their capitals are: London, Cardiff, Edinburgh and Belfast respectively. The population of the country is over 57 million people; about 80 % of them live in cities and towns.

Great Britain is separated from the European continent by the English Channel and the Strait of Dover. The west coast of the country is washed by the Irish Sea, the east coast is washed by the North Sea. There are a lot of rivers in Great Britain, but they are not very long and not good for navigation. The chief rivers are the Severn and the Thames.

The climate in the United Kingdom is generally mild and temperate due to the influence of the Gulf Stream. It is mild, humid and changeable. It is never too hot or too cold. Great Britain is well known as a foggy and rainy country.

The United Kingdom is a highly developed industrial country. It is known as one of the world's largest producers and exporters of machinery, electronics, textile, aircraft and navigation equipment. One of the main important industries of the country is shipbuilding. The largest cities of Great Britain are: London, Birmingham, Glasgow, Liverpool, Manchester, Sheffield, Bristol, Leeds, Edinburgh.

The United Kingdom is a monarchy. The Queen is the official head of the state. The legislative power is vested in Parliament. It consists of two chambers: the House of Lords and the House of Commons. There are three main political parties: the Labour, the Conservative and the Liberal. The party which wins the majority of seats in Parliament forms the Government and its leader becomes Prime Minister. The Prime Minister chooses about twenty MP's from his party to become Cabinet Ministers. Each minister is responsible for a particular area of government.

English is the official language, but some people speak Scottish, Welsh and Irish. The flag of the United Kingdom, known as the Union Jack, is made up of three crosses. The upright red cross is the cross of St. George, the patron saint of England. The white diagonal cross (with arms going into the corners) is the cross of St. Andrew, the patron saint of Scotland. The red diagonal cross is the cross of St. Patrick, the patron saint of Ireland. David is the patron saint of Wales. Rose is a symbol of England, daffodil is a symbol of Wales, thistle is the symbol of Scotland and shamrock is the symbol of Ireland.

Political system of the USA

The U.S. A. is a **federal republic of 50 states**. Besides the **48 contiguous states** that occupy the middle latitudes of the continent, the United States includes **the state of Alaska** at the north-western extreme of North America and **the island state of Hawaii** in the mid-Pacific Ocean. The conterminous states are bounded on the north by Canada, on the east by the Atlantic Ocean, on the south by the Gulf of Mexico and Mexico and on the west by the Pacific Ocean. The national capital is Washington, which is coextensive with the District of Columbia, the federal capital region created in 1790. New York is the most important economic and cultural center.

Geographic characteristic of the USA

The **total area** of the United States is **3,679,192 square miles** (9,529,063 square kilometres), making it the fourth largest country in the world in area (after Russia, Canada and China). Outlying territories and other politically associated areas in the Pacific Ocean and the Caribbean Sea add approximately 4,000 square miles to this figure.

The major **characteristic of the United States** is probably its great variety. Its physical environment ranges from the Arctic to the subtropical, from the moist rain forest to the arid desert, from the rugged mountain peak to the flat prairie. Although the total population of the United States is large by world standards, its overall population density is relatively low; the country embraces some of the world's largest urban concentrations as well as some of the most extensive areas that are almost devoid of habitation.

Population of the USA

The population of the US is 330 millions. The United States contains a highly **diverse population**; but, unlike a country such as China that largely incorporated indigenous peoples, its diversity has to a great degree come from an immense and sustained global immigration.

Probably no other country has a wider range of racial, ethnic and cultural types than does the United States. In addition to the presence of surviving native Americans (including American Indians, Aleuts and Eskimo) and the descendants of Africans taken as slaves to America, the national character has been enriched, tested, and constantly redefined by the tens of millions of immigrants who by and large have gone to America hoping for greater social, political and economic opportunities than they had in the places they left.

Economy of the USA

The United States is **the second world's greatest economic power**, measured in terms of gross national product (GNP). The nation's wealth is partly a reflection of its rich natural resources and its enormous agricultural output, but it owes more to the country's highly developed industry. Despite its relative economic self-sufficiency in many areas, the United States is the most important single factor in world trade by virtue of the sheer size of its economy. Its exports and imports represent major proportions of the world total. The United States also impinges on the global economy as a source of and as a destination for investment capital. The country continues to sustain an economic life that is more diversified than any other on Earth, providing the majority of its people with one of the world's highest standards of living.

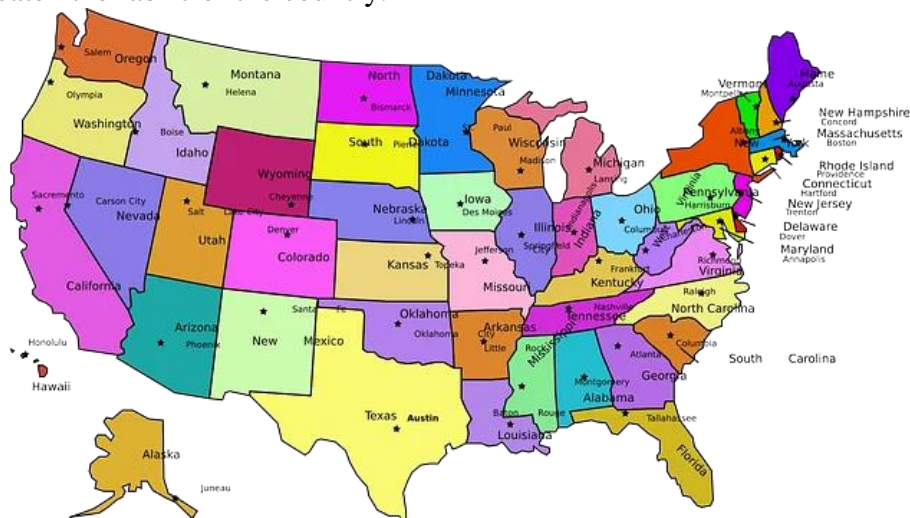

History of the USA

The United States is relatively young by world standards, being barely more **than 200 years old**; it achieved its current size only in the mid-20th century. America was the first of the European colonies to separate successfully from its motherland, and it was the first nation to be established on the premise that sovereignty rests with its citizens and not with the government.

In its first century and a half, the country was mainly preoccupied with its own territorial expansion and economic growth and with social debates that ultimately led to civil war and a healing period that is still not complete.

In the 20th century the United States emerged as a **world power**, and since World War II it has been one of the pre-eminent powers. It has not accepted this mantle easily nor always carried it willingly; the principles and ideals of its founders have been tested by the pressures and exigencies of its dominant status.

Although the United States still offers its residents opportunities for unparalleled personal advancement and wealth, the depletion of its resources, contamination of its environment, and continuing social and economic inequality that perpetuates areas of poverty and blight all threaten the fabric of the country.

Map of the USA.

Cities of the USA

There are very many large cities in the USA.

Washington, the capital of the United States of America, is situated on the Potomac River. In comparison with such ancient historical cities as, for example, Rome, London, Moscow or Paris, Washington is quite young. The capital owes much to the first President of the USA — George Washington. It was G. Washington, who chose the place for the capital and laid in 1790 the corner-stone of the Capitol, where Congress sits. Washington has many historical places. The largest and highest among the buildings is the Capitol with its great House of Representatives and the Senate chamber. There are no sky-scrappers in Washington because no other building can be higher than the Capitol.

New York is the largest city in the USA and the biggest sea-port. It is situated in the mouth of the Hudson River. New York was founded by the Dutch. It is interesting to know that Manhattan Island — the central part of New York — was bought from the local Indians by the Dutch for 24 dollars. That was the most profitable commercial deal in the US history. Today Manhattan is the heart of business and commercial life of the country. New York is the city of skyscrapers. The highest of them is the 102-storeyed building. There are many other places of interest in New York: Central Park, Times Square, Rockefeller Centre, the shopping districts and the United Nations Building. In Manhattan, at Broadway, there is Columbia University, one of the biggest universities of the USA.

Another large city of the USA is Boston, one of the first cities which were built on the Atlantic coast of America. It is an important port and a financial and cultural centre. It has three universities.

Chicago is one of the biggest industrial cities in the USA and the second largest after New York. Los Angeles, in California, is the centre of modern industries. Hollywood is the centre of the US film industry.

London.

London, is the capital of Great Britain. It's a very big city. London is situated on the river Thames. The Thames is the deepest river in Britain. There are 27 bridges over the Thames.

Tower Bridge is one of the oldest and most beautiful bridges in London. It is more than 100 years. About 9 ml people live in London.

London is one of the most beautiful cities in the world. It is also a very old city. London is 2000 years old. London consists of 3 main parts: the City, the West End and the East

End. The City is the Heart of London, it's business centre. There are many banks and offices there. The West End is the richest part of London. The main interesting places are situated there. And the East End is a working part of London.

The political centre is Westminster. Westminster Abbey is there. It is the traditional place of coronation for English monarchs. Many people are buried in the church.

There are many sights in London. Trafalgar Square is the most popular place for people to meet. In the middle of the square there is Nelson's Column, which is 51 m. high.

The Queen of England lives in Buckingham

palace. It is the most famous place in London. There are 600 rooms in it. It has an indoor swimming pool and a cinema.

One of the greatest English churches, St. Paul's Cathedral, is not far

from the Tower of London. The famous English architect Sir

Christopher Wren built it in the 17th century after the Great Fire. It is a beautiful building with many columns and towers. It is a royal church.

The most interesting museum is the Tower of London. The Tower of London was a fortress, a palace, a prison and the King's Zoo. Now it's a museum. There are always black ravens in the

Tower of London. People believe that London will be rich while the ravens live there.

Russia is the largest country in the world. *It occupies about the one seventh of the earth's surface.* Russia covers the eastern part of Europe and the northern part of Asia.

The country is washed by 12 seas of three oceans: the Pacific, the Arctic and the Atlantic. In the south Russia borders on China, Mongolia, Korea, Kazakhstan, Georgia and Azerbaijan. In the west it borders on Norway, Finland, the Baltic States, Belorussia, the Ukraine. It also has a sea border with the USA.

The population of Russia is 145.5 million people. 83 percent are Russians. *The capital of the country is Moscow.* It is the largest city and has a population of about 12 million people (2016).

There is hardly a country in the world with such a variety of scenery and vegetation. *Russia has steppes in the south, plains and forests in the central region, tundra and taiga in the north, highlands and deserts in the east.*

Russia is located on two plains. They are the Great Russian Plain and the West Siberian Lowland.

There are several mountains chains on the territory of the country: the Urals, the Caucasus, the Altai and others. The largest mountain chain, the Urals, separates Europe from Asia.

In Russia there are long rivers and deep lakes. The Volga is the biggest Europe's river. The world's deepest lake is Lake Baikal. The water in Lake Baikal used to be very clean. It was so clear that if you look down you can count the stones on the bottom.

Russia has one sixth of the world's forests. They are concentrated in the European north of the country, in Siberia and in the Far East.

Over the vast territory of the country there are various types of climate, from arctic in the north to subtropical in the south. In the south-west the weather is usually mild and wet; northern Asia is one of the coldest places on the earth, and in the south the heat is unbearable. But in the middle of the country the climate is moderate and continental.

Russia is very rich in mineral resources. It exports oil and natural gas.

In recent years the political and economic situation in the country has started getting out of the crisis.

OFFICIAL SYMBOLS OF RUSSIA

State Russian symbols include the Russian flag, the Russian National Emblem (герб) and the Russian anthem (гимн).

The current Russian flag was adopted on August 21, 1991 just before the country became an independent state. The Russian flag is tricolor. It consists of three horizontal stripes: white, blue, and red. The white color denotes nobleness and sincerity, the blue — loyalty and honesty, and the red — courage and generosity. Most historians trace the origin of Russia's flag to Peter the Great. In 1699 Peter selected the flag similar to the flag of the Netherlands — white, blue and red flag. His design was used as a Russian maritime flag for merchant ships and then it was adopted as the civil flag of Russia in 1883.

The Russian National Emblem - the two-headed eagle first appeared in Russia in the 15th century. Two-headed eagle has been the symbol of the monarchy of Russia for more than four hundred years. But with the advent of Russian revolution it was on the verge of extinction. In 1993, under the initiative of President Boris Yeltsin it was again adopted on 30th November 1993.

The two heads of the eagle stand for the two parts of vast Russian empire — European and Asian. There are three historical crowns of Peter the Great above the two-headed eagle (they are symbols of the sovereignty both in Russia as a whole and in its parts). The eagle holds in claws sceptre and orb as embodiment of State power and united state.

On its chest there is a horseman – Russian St. George – who is killing an evil snake with his spear. That is one of the oldest symbols of victory of Russia against all its enemies, symbol of the struggle of good against evil, light against gloom.

National Anthem of Russia

For a long time Russia had no anthem. The various church hymns and military marches were used to honour the Russia up to 1816, when the “Молитва русских“ («Prayer of the Russians») by Russian poet V. Zhukovskii was chosen as the national anthem.

The second official anthem “Боже, царя храни“ was presented in 1833, on December 25th, when the nation celebrated the expulsion of the French from Russia. That anthem existed until the October revolution of 1917 and was replaced to the new anthem of the victorious proletarian revolution — «International» — in 1918.

In 1944, the national anthem of Russia was accepted. The music was composed by Alexander Alexandrov and the lyrics were written by Russian Federalist Sergey Mikhalkov.

After the collapse of the Soviet Union, in 1993, a government commission and President Yeltsin offered a new national anthem “Патриотическая песня“ («Patriotic Song») by M. Glinka.

However this anthem was unpopular and didn't inspire Russians. People preferred the old Soviet anthem instead of it.

The Political System of Russia

The Russian Federation was set up by the Constitution of 1993. After its destruction in 1991, the Soviet Union was broken up into an independent Russia and 14 other new, sovereign nations.

The Russian Federation is a presidential (or a constitutional) republic. The President is the head of state and is elected directly by the people. He controls all the three branches of power. The President is commander-in-chief of the armed force, he makes treaties and enforces laws, appoints the prime minister, cabinet members and key judges. The President can override and in some cases even dissolve the national parliament, the bicameral Federal Assembly. The President has his administration, but it is not part of the Federal Government. The President is involved in the work of the legislative and executive branches.

The government consists of three branches: legislative, executive and judicial. Each of them is checked and balanced by the President. The legislative power is vested in the Federal Assembly. It consists of the Federation Council (upper house) and the State Duma (lower house). The members of the State Duma are elected by popular vote for a four-year period. The Federation Council is not elected. It is formed of the heads of the regions. Each Chamber is headed by the Chairman. Legislation is initiated in the State Duma, but to become a law a bill must be approved by the lower and upper house and signed by the President. The executive power belongs to the Government. The judiciary branch is represented by the Constitutional Court, the Supreme Court and regional courts.

5. Choose the correct answer

- 1) The Russian Federation is a parliamentary monarchy.
- 2) The President is the head of state and is elected by the State Duma.

MOSCOW

Moscow is the capital of Russia, its political, economic, commercial and cultural centre. It was founded 8 centuries ago by Prince Yuri Dolgoruky.

Historians have accepted the year of 1147 as the start of Moscow's history.

Gradually the city became more and more powerful. In the 13th century Moscow was the centre of the struggle of Russian lands for the liberation from the tartar yoke. In the 16th century under Ivan the Terrible Moscow became the

capital of the new united state. Though Peter the Great moved the capital to St Petersburg in 1712, Moscow remained the heart of Russia. That is why it became the main target of Napoleon's attack. Three-quarters of the city was destroyed by fire during Napoleon's occupation, but by the mid-19th century Moscow had been completely restored. After the October revolution Moscow became the capital again.

Now Moscow is one of the largest cities in Europe. Its total area is about nine hundred (900) square kilometres (ancient Moscow occupied the territory of the present-day Kremlin). The population of the city is over 9 million.

Moscow is one of the most beautiful cities in the world. The heart of Moscow is Red Square. It has more historic associations than any other place in Moscow. The Kremlin and St Basil's Cathedral (Vasily Blazheny) are masterpieces of ancient Russian architecture.

The main Kremlin tower, the Spasskaya Tower, has become the symbol of the country. On the territory of the Kremlin you can see old cathedrals, the Bell Tower of Ivan the Great, the Tzar-Cannon and the Tzar-Bell, the biggest cannon and bell in the world. St Basil's

Cathedral was built in the mid-16th century in memory of the victory over Kazan. There's a legend that Ivan the Terrible blinded the architects Barma and Postnik, because he didn't want them to create another masterpiece.

There are a lot of beautiful palaces, old mansions, cathedrals, churches and monuments in Moscow. Now Moscow is being reconstructed and we all hope that in a few years the city will become even more beautiful.

There are more than 100 museums in Moscow. The largest museums are the Pushkin Museum of Fine Arts and the State Tretyakov Gallery. Other unique museums in Moscow include the All-Russia Museum of Folk Arts, the Andrei Rublev Museum of Early Russian Art, Alexei Bakhrushin Theatre Museum, Mikhail Glinka Museum of Musical Culture and many others.

Moscow is famous for its theatres. The best-known of them is the Bolshoi Opera House. Drama theatres and studios are also very popular.

Moscow is a city of students. There are over 100 higher educational institutions in it.

Moscow is the seat of the Russian Parliament (the Duma) and the centre of political life of the country.

RUSSIAN TRADITIONS

Almost every nation and country has a reputation of some kind.

First, let's speak about Russian people. To my mind, the main traits of their characters that differ them from other people are hospitality, their «open heart», «golden hands», and wise Russian fairy-tales reflect this wisdom. Our people are hardworking, patient, never losing hope for better life. The Russians are talented people. Russia gave the world famous names of Pushkin and Lermontov, Chaikovsky and Repin, thousands of names of world-famous poets, writers, composers, scientists. All of them are the pride of the nation because they sang the beauty of our nature and people.

Our country is famous for Russian traditional specific crafts and its skilled craftsmen. Painted boxes of Palekh, coloured shawls of Pavlov Posad, clay toys of Dymkovo, laces of Vologda are known all over the world.

The names of Gzhel and Khokhloma are considered to be the symbols of Russia as well as matryoshkas and samovars. The history of khokhloma goes back into the 17th century. Producing of tableware - dishes, spoons, mugs was begun at that time in the villages of Syomino and Khokhloma in the Nizhny Novgorod Province, on the banks of the great Russian river Volga. Many carpenters, painters have been working since then reviving traditions of old masters. The Khokhloma style is characterized by using plant elements in painting the tableware. The

prevailing colours are black, yellow, golden, green and red. And nowadays this craft is sure to be saved, it will be developed and brought into the future by the new generation of painters.

Now we celebrate the forgotten holidays - Troitsa, Maslenitsa, the Easter. We again sing Russian folk songs and chastushki, dance Barinya and perform khorovods, ride in troikas. Traditional Russian cooking is world-famous for such dishes as okroshka, shi, pelmeni, kurnik, kvas. We begin to build and reconstruct churches. The example of it is the building of the Cathedral of Christ the Saver in Moscow. It is the symbol of reviving human feelings, national pride and patriotism.

2. Переведите словосочетания на русский язык.

What Profession to Choose

Words to the text:

1. special – особый
2. deal with – иметь дело с
3. precious – драгоценный
4. noble – благородный
5. educated – образованный
6. are available – доступны
7. enter an institute – поступить в институт
8. strong will – сильная воля
9. strength of will – сила воли
10. come true – сбыться

Choosing a profession is very difficult. Your choice should depend on your character, intellect, abilities and talent.

Do you think someone can be a good teacher if he/she doesn't love children?

Do you think someone can be a good vet if he/ she doesn't like animals?

Can a musician or singer make a success if they don't have a good ear for music? Can an actor or dancer become famous if they have no **special** talent?

You can never be a **respectable** judge if you are not **just** and **honest**.

Only those who are brave, can become sailors.

Only people who have **creative** minds can be **successful** businessmen.

The profession of a doctor requires **special** education and long training. A doctor must be very **responsible** because they **deal with** the most **precious** thing that people have — their health.

There are a lot of interesting and **noble** professions, and many roads are opened before you. But remember most professions **are available** only to educated people. So if you want to be a professional you have **to enter an institute** or university. It is difficult and you have to study hard. It is not easy, because only those who have a **strong will**, can study hard. Try to build your character, develop the **strength of will** and your dreams will **come true**.

2. Questions to the text:

- 1) Have you already decided what you want to be?
- 2) What did you want to be in your childhood?
- 3) What is your father?
- 4) What is your mother?
- 5) Do you want to choose the profession of your parents?
- 6) Do you have the strength of will?

Remember these traits of character:

1. respectable – уважаемый
2. just – справедливый
3. honest – честный
4. creative – творческий
5. successful – успешный
6. responsible – ответственный

1. Вставьте частицу *to*, где это необходимо.

1. Parents should let the children ... have private life.
2. I waited for my friend ... get off the bus.
3. They made me ... do it.
4. We can't ... let him stay outdoors.
5. He ordered the car ... come at 5 p.m.
6. At last he was made ... write a letter to his parents.
7. Children were allowed ... go to the cinema alone.
8. Let us ... be friends.
9. What makes you ... think so?
10. Don't let him ... drive so fast.

2. Измените предложения, используя фразу-образец выше и переведите их.

1. It is difficult to recognize him.
2. It is interesting to talk to her.
3. It was impossible to read his handwriting.
4. It was easy to answer the question.
5. It is very important to understand the rule.

3. Переведите предложения на английский язык.

1. Честно говоря, я его не знаю.
2. Сказать по правде, я так не думаю.
3. Короче говоря, ему не следует беспокоиться.
4. Для начала, она решила убраться в комнате.
5. Мы решили взять еще 1000 долларов, на всякий случай.

4. Раскройте скобки, употребляя требующуюся форму инфинитива.

1. He seems (to read) a lot. 2. He seems (to read) now. 3. He seems (to read) since morning. 4. He seems (to read) all the books in the library. 5. I want (to take) you to the concert. 6. I want (to take) to the concert by my father. 7. She was glad (to help) her friends. 8. She hoped (to help) by her friends. 9. I hope (to see) you soon. 10. We expect (to be) back in two days. 11. He expected (to help) by the teacher. 12. The children seem (to play) since morning. 13. I am glad (to do) all the homework yesterday. 14. She seems (to work) at this problem ever since she came here. 15. I am sorry (to break) your cup. 16. His English seems (to get) better. 17. He is glad (to help) with his health problems.

5. Раскройте скобки, употребляя требующуюся форму инфинитива.

1. I am sorry (to bother) you, but the students are still waiting (to give) books for their work.
2. Is there anything else (to tell) her?
3. He hates (to talk) about.
4. He was lucky (to be) to that famous exhibition and (to see) so many wonderful paintings.
5. The woman pretended (to read) and (not to hear) the bell.
6. The only sound (to hear) was the snoring of grandfather in the bedroom.
7. She was pleased (to sit) still and (to watch) the dancers moving.
8. You seem (to look) for trouble.
9. They seemed (to wait) for ages.
10. He seems (to know) French very well: **he is said** (to spend) his youth in Paris.*
11. It seemed (to snow) heavily since early morning: the ground was covered with snow.
12. They seemed (to quarrel): I could hear angry voices from behind the door.

MY FUTURE PROFESSION MECHANIC

The profession of mechanic in today's world, the technological process has a wide profile, so popular and very in demand. Workers-auto mechanics perform maintenance and repair of motor vehicles, monitor the technical condition of vehicles with the help of special diagnostic equipment and can drive in motor vehicles. People working in the specialty of mechanic, must be physically strong, tough, have good vision and coordination.

The first car appeared in the middle of the XVIII century in countries where previously only appeared transport, able to move independently. Since then self-moving mechanisms for changing and improving. But any mechanism needs timely maintenance and repair, requiring specially trained and well-versed in car design people. So there was a profession MECHANIC...

In the modern world the mechanic profession is very popular, as the streets are crowded with vehicles of Russian and foreign производств a. Thanks to the work of the mechanic life of the

vehicle increases significantly, which in turn reduces the risk of traffic accidents and ensures the safety of drivers on the roads.

Despite the fact that the profession mechanic is fairly common, it is still popular in large cities with multi-million populations and regions of the country. The employment agencies personnel, as well as Newspapers and Internet sites that deal with finding and delivering work, you can always find the position of auto mechanic. As in any other profession, the most important criterion is the qualification and experience of the employee. Therefore, engineers are constantly improving their knowledge and skills.

The job of a mechanic is associated with heavy physical loads, so it is not recommended to people suffering from diseases of musculoskeletal apparatus, respiratory organs, cardiovascular and nervous system.

An auto mechanic (car mechanic) — a worker performing the repair and maintenance of automobile transport, as well as exercising control over technicalthe condition of the vehicles using diagnostic equipment and devices, such as dynamometer, scanner, etc.

In our time the mechanic profession is very in demand in the modern world, where the streets through the millions of cars of Russian and foreign production. THE MECHANIC SHOULD KNOW: safetydevice principles of operation of the repaired equipment, power systems, machines, machines;the properties of processed materials, anti-rust greases and oils;methods of restoration of worn parts;the technical requirements for the testing, adjustment and acceptance of the units, mechanisms and equipment after repair;the device and methods of using special devices and measuring instruments;mathematics and physics. Today the mechanic profession and actual demand. Quality work mechanic allows to increase terms of operation of the vehicle, to carry out timely prevention of its functional condition, which ensures road safety.

The majority of auto service workers are the auto mechanics and car mechanics. More versatile than these professionals, the more they are in demand, since the same people can perform repair and troubleshoot minor problems. In small workshops, mostly are generalists in every sense of the word: they do everything from beginning to end. In the service station are not accustomed lazy and temporary workers, but he generously rewards those who finds the strength and desire to work.

The car is of great material value, so the mechanic needs when the execution of the works to exercise the utmost caution and precision to avoid damage to the commodity and the look of the car.

The mechanic must constantly improve their professional skills and knowledge of the car market. Follow all the innovations and advanced technologies in the global automotive industry.

Science and Technology

In recent years, scientific and technological developments have drastically changed life on our planet as well as our views both of ourselves as individuals in society and of the Universe as a whole.

Today, science and technology are closely related. Many modern technologies such as nuclear power and space flights depend on science and the application of scientific knowledge and principles.

Each advance in pure science creates new opportunities for the development of new ways of making things to be used in daily life. In turn, technology provides science with new and more accurate instruments for its investigation and research.

Technology refers to the ways in which people use discoveries to satisfy needs and desire, to alter the environment, to improve their lives. Throughout human history, men and women have invented tools, machines, materials and techniques, to make their lives easier.

Of course, when we speak of technology today, we are looking at it in a much narrower sense. Generally, we mean industrial technology, or the technology that began about 200 years ago with the development of power-driven machines, growth of the factory system, and mass production of goods that has created the basis for our modern society. Today we often say that we live in an age of science and technology. According to one estimate, 90 % of all the scientists who ever lived, were alive and active in the 1970-s. This increased scientific activity has brought new ideas, processes, and inventions in ever-growing amount.

The scientific revolution that began, in the 16th century was the first time that science and technology began to work together. Thus, Galileo, who made revolutionary discoveries in astronomy and physics, also built an improved telescope and patented a system of lifting water. However, it was not until the 19th century that technology truly was based on science and inventors began to build on the work of scientists. For example, Thomas Edison built on the early experiments of Faraday and Henry in his invention of the first practical system of electrical

lighting. So too, Edison carried on his investigations until he found the carbon filament for the electric bulb in a research laboratory. This was the first true modern technological research. In a sense, the history of science and technology is the history of all humankind.

2. Answer the questions:

1. What role has scientific and technological development played in man's life?
2. What proves that science and technology are closely related today?
3. What does the term "technology" refer to?
4. What does the term "industrial technology" mean?
5. How is scientific activity in the 1970-ies estimated?
6. What facts prove that the scientific revolution of the 16th century was the first time that science and technology began to work together?

3. Give a short summary of the text.

Trends In The Modern Machine-Building Industry

The scientific and technological progress will continue in engineering along two main headlines. Firstly, it is automation, including the creation of "unmanned" industries. Secondly, raising the reliability and extending the service life of machines.

This certainly requires new technology. The machine modules on a large scale are well suited for "unmanned" industries.

Intense work is being carried out on new robots. What we need is not merely manipulators which can take up a workpiece and pass it on, but robots which can identify objects, their position in space, etc.

We also need machines that would trace the entire process of machining. Some have been designed and are manufactured. Modern engineering thinking has created new automated coal-digging complexes and machine systems, installations for the continuous casting of steel, machine-tools for electrophysical and electrochemical treatment of metals, unique welding equipment, automatic rotor transfer lines and machine-tool modules for flexible industries.

New technologies and equipment have been designed for most branches of engineering.

In the shortest time possible the engineers are to start producing new generations of machines and equipment which would allow manufacturers to increase productivity several times and to find a way for the application of advanced technologies.

Large reserves in extending service life for machines can be found in the process of designing. At present, advanced methods have been evolved for designing machines proceeding from a number of criteria. Automatic design systems allow for an optimizing of the solutions in design and technology when new machines are still in the blueprint stage.

A promising reserve in increasing the life of parts is strengthening treatment. In recent years new highly efficient methods have been found.

First and foremost of them is the vacuum plasma methods for coating components with hard alloy compounds, such as nitrides and carbides of titanium, tungsten and boron. Methods have been designed for reinforcing machine parts most vulnerable to wear and tear, such as in grain harvesters, to make them last several times longer.

Thus, it is not merely quantity engineers and scientists are after, rather it is a matter of major characteristics. In other words, this is a matter of quality, and not of the mere number of new machines, apparatuses and materials

2. Найдите данные слова в тексте и уточните их значения по контексту:

module, robot, to identify, manipulator, electro physical, electrochemical, unique, rotor, line, productivity, to reserve, criteria, to optimize, vacuum, plasma, component, nitride, carbide, titanium, apparatus.

3. Найдите в тексте эквиваленты для следующих русских словосочетаний:

срок службы, передовые методы, электрофизическая обработка, модуль станка, система проектирования, составы из твердых сплавов, методы вакуумной плазмы, упрочнение деталей машин, гибкое производство, полностью автоматизированное производство

4. Определите какие выражения правдивы, а какие нет:

1. There are two main trends in modern machine-building: automation and raising of the reliability of machines.
2. The creation of «unmanned» industries is included into automation.
3. Machine modules and robots are not suited for «unmanned industries».
4. Automation and raising of the reliability of machines require new technologies.
5. Advanced technologies are applied in most branches of engineering.
6. The service life of machine parts can't be increased by strengthening treatment.
7. Hard alloy compounds are employed for coating components.
8. The process of designing can also be automated. This gives the advantage of optimizing solutions in design and technology.

National and international exhibitions

Very many national and international specialized exhibitions are held every year in different countries of our world. From year to year the number of companies and countries participating in such exhibitions is growing. The scope of exhibitions is also getting larger.

The present exhibitions include a wide range of showpieces showing the important achievements in different fields of science, industry and agriculture of different countries.

These exhibitions are usually crowded with different visitors with their different interests and demands. The participants of these exhibitions can negotiate with their customers, sale their goods and purchase the goods they need.

A national or an international exhibition is a way to advertise the products of a company. Such exhibitions usually have their mottoes, for example: people and environment, economical cooperation, technical progress and so on. The international exhibitions fasten the friendship among different nations and countries.

2. *Переведите рассказ об отраслевой выставке:*

We visited the exhibition of commercial vehicles in Moscow. Exhibitors from dozens of countries came here. Tractors, cranes, emergency cars, trucks, ATVs — there is something to see. In many exhibits you can sit and study them from within.

Among the presented novelties were minibuses of the future. These are small capsules that will move without a driver based on computer data and geolocation.

For children, various entertainments were organized at the exhibition, so that adults could safely inspect the exhibits.

Traditionally, the exhibition includes many contracts. This is the largest industry exhibition in Europe.

— У нас есть несколько моделей.

— А что из этого самое свежее?

— Вот этот станок — здесь есть компьютерная диагностика, очень продуманы все процессы, и он очень эффективен в работе.

— Я вижу он стоит дороже чем остальные станки.

— Так и есть, это наша новинка. Но мы можем поговорить о скидке и рассрочке платежа.

Если вам интересно, я проведу вас к менеджеру, который решит с вами эти вопросы.

— Да, конечно.

— Hi. You have a very interesting stand.

— Thank you. Did something interest you?

— Yes. I have a car service and I need a tire changer.

— We have several models.

— And what of this most fresh?

— Here is the machine tool — here there is computer diagnostics, all processes are very thought out, and it is very effective in work.

— I see it costs more than other machines.

— So it is, this is our novelty. But we can talk about discount and installment payment. If you

interenso, I will fail you to the manager who will solve these questions with you.

— Oh sure.

Scientific and technical progress

The basis of scientific and technical progress of today is new informational technology which is very different from all the previous technologies. Thanks to up-to-date **software** and robots new informational technologies can make many processes much faster and **transmit** information more quickly. It is important today because the quantity of information grows rapidly.

New informational society has its peculiarities. Firstly, more and more employees work in the sphere of service and information. Secondly, more and more huge **databases** appear to collect and store the information. And finally, information and IT become goods and start playing important part in the country's economy.

These processes **affect** social structures and values. It becomes important to learn to get new knowledge quickly and sometimes to change your qualification. IT can first **lead** to unemployment, but later create even more workplaces especially for **highly qualified** professionals. While the hardest work can be performed by robots and routine **calculations** by computers, in the future people with the most creative mind and numerous fresh ideas will get better career chances.

On the one hand technology **development** gives more **access** to professional and cultural information and leads to new forms of individual enterprises, but on the other hand there is a danger of total control of private life unless special laws are **enforced** by the government. Another danger is «intellectual terrorism» when computer viruses block important programs.

There are other directions of technical and scientific progress of today. One of them is the development of new ecologically clean **sources** of energy using sun, gravitation, winds or rain. New kind of transports and new agricultural methods that do not **harm** our nature are being developed today.

Breakthroughs in science have led to creation of artificial viruses for new medicines and products, body organs for transplantation and productive soils for growing vegetables and **crops**. Many new materials and technologies are being used in our everyday life.

All these innovations may have influence on our life, social relations and **globally** on our Earth.

The influence can be very different: from psychological and health problems of children who spend too much time online to an opportunity to prevent **genetic** diseases for future generations. But the most difficult problems the **humanity faces** are global problems.

The first and foremost is ecological problem: pollution of air, water and soil, exhaustion of natural resources. Renewable natural resources such as oxygen, forests, flora and fauna do not have enough time to regenerate. This leads to different changes in climate and nature such as depletion of ozone layer and other things that has not been properly studied by scientists yet.

Other **crucial** problems include wars, epidemics, and demographic problems. The only way to solve them is to work globally and in cooperation with other countries. And here the humanity should find a way to use new technologies for the **common good**. The **solution** of these problems cannot be postponed because **otherwise** people will have fewer chances to survive on this planet.

2. Answer the questions

1. Why is IT progress different from other progresses?
2. What are the peculiarities of information society?
3. What is the role of information in this society?
4. According to the text who will have better career chances in the near future and why?
5. What are the possible dangers of wide access to information?
6. What ecologically clean sources of energy do you know?
7. How can scientific innovations influence our everyday life?
8. What are the key problems that humanity faces today?
9. How can these problems be solved?
10. What ecological problems are mentioned in the text?
11. What are the benefits of the scientific and technical progress?
12. What are the drawbacks of the scientific and technical progress?

ROBOTS IN MANUFACTURING

Today most robots are used in manufacturing operations. The applications of robots can be divided into three categories: 1. material handling; 2. processing operations; 3. assembly and inspection. Material-handling is the transfer of material and loading and unloading of machines. Material-transfer applications require the robot to move materials or work parts from one to another. Many of these tasks are relatively simple: robots pick up parts from one conveyor and place them on another. Other transfer operations are more complex, such as placing parts in an arrangement that can be calculated by the robot. Machine loading and unloading operations utilize a robot to load and unload parts. This requires the robot to be equipped with a gripper that can grasp parts. Usually the gripper must be designed specifically for the particular part geometry. In robotic processing operations, the robot manipulates a tool to perform a process on the work part. Examples of such applications include spot welding, continuous arc welding and spray painting. Spot welding of automobile bodies is one of the most common applications of industrial robots. The robot positions a spot welder against the automobile panels and frames to join them. Arc welding is a continuous process in which robot moves the welding rod along the welding seam. Spray painting is the manipulation of a spray-painting gun over the surface of the object to be coated. Other operations in this category include grinding and polishing in which a rotating spindle serves as the robot's tool.

The third application area of industrial robots is assembly and inspection. The use of robots in assembly is expected to increase because of the high cost of manual labour. But the design of the product is an important aspect of robotic assembly. Assembly methods that are satisfactory for humans are not always suitable for robots. Screws and nuts are widely used for fastening in manual assembly, but the same operations are extremely difficult for a one-armed robot. Inspection is another area of factor operations in which the utilization of robots is growing. In a typical inspection job, the robot positions a sensor with respect to the work part and determines whether the part answers the quality specifications. In nearly all industrial robotic applications, the robot provides a substitute for human labour. There are certain characteristics of industrial jobs performed by humans that can be done by robots: a) the operation is repetitive, involving the same basic work motions every cycle; b) the operation is hazardous or uncomfortable for the human worker (for example: spray painting, spot welding, arc welding, and certain machine

loading and unloading tasks); c) the workpiece or tool are too heavy and difficult to handle; d) the operation allows the robot to be used on two or three shifts.

Vocabulary:

handling - обращение; transfer - передача, перенос; location - местонахождение; pick up - брать, подбирать; arrangement - расположение; to utilize - утилизировать, находить применение; gripper - захват; to grasp - схватывать; spot welding - точечная сварка; continuous - непрерывный; arc welding - электродуговая сварка; spray painting - окраска распылением; frame - рама; spray-painting gun - распылитель краски; grinding - шлифование; polishing - полирование; spindle - шпиндель; manual - ручной; labour - труд; hazardous - опасный; shift - смена.

2. Fill in the blanks.

1. Material-transfer applications require the robot to move ... from one to another;
2. Machine loading and unloading operations utilize ... to load and unload parts;
3. The applications of robots can be divided into three categories: ...;
4. In nearly all industrial robotic applications, the robot provides ... for human labour.

3. Answer the questions:

1. How are robots used in manufacturing?
2. What is «material handling»?
3. What does a robot need to be equipped with to do loading and unloading operations?
4. What does robot manipulate in robotic processing operation?
5. What is the most common application of robots in automobile manufacturing?
6. What operations could be done by robot in car manufacturing industry?
7. What are the main reasons to use robots in production?
8. How can robots inspect the quality of production?
9. What operations could be done by robots in hazardous or uncomfortable for the human workers conditions?
10. Call certain characteristics of industrial jobs that can be done by robots.

4. Translate into English

Страдательный залог

Действительный и страдательный залоги в английском языке совпадают со значением соответствующих залогов в русском языке.

Глагол в действительном залоге (**Active Voice**) показывает, что *действие совершает лицо или предмет, выраженный подлежащим*.

He often asks questions. Он часто задаёт вопросы.

Глагол в страдательном залоге (**Passive Voice**) означает, что *действие направлено на предмет или лицо, выраженное подлежащим*.

He is often asked questions. Ему часто задают вопросы.

Формы страдательного залога образуются при помощи глагола **to be** в соответствующей форме и **Participle II** (Причастие II) смыслового глагола.

to be + Participle II

Действительный залог	Страдательный залог
He often writes letters.	Letters are often written by him.

He wrote the letter yesterday.	The letter was written by him yesterday.
He will write the letter.	The letter will be written by him.
He has written the letter.	The letter has been written by him.
He is writing the letter.	The letter is being written by him.

Страдательный залог после модальных глаголов

Образование мод. глагол + <i>be</i> + V_3	Примеры
can	The work can be done easily.
may/might	The letter might be written later.
must	The room must be cleaned at once.
should	Teeth should be cured on time.
have/has/had to	The test had to be written yesterday.
ought to be	Adults ought to be respected .

Сказуемое в страдательном залоге может переводиться на русский язык:

- а) кратким страдательным причастием;
- б) глаголом на –ся;
- в) неопределённо-личным глаголом.

The house is built. а) Дом построен. б) Дом строится. в) Дом строят.

Следует обратить особое внимание на перевод глаголов с предлогом в страдательном залоге.

Наиболее распространённые из этих глаголов:

- | | |
|--|-------------------------------|
| hear of – слышать о | laugh at – смеяться над |
| look after – присматривать за (кем-либо) | |
| look at – смотреть на | rely on – полагаться на |
| send for – посылать за | speak of (about) – говорить о |
| pay attention to – обращать внимание на | |
| take care of – заботиться о | |

The book **is much spoken about**. Об этой книге много говорят.

He **can't be relied on**. На него нельзя положиться.

В русском переводе не все глаголы сохраняют предлог:

- | | |
|---|-------------------------------|
| to listen to – слушать что-либо, кого-либо | to look for – искать что-либо |
| to provide for – обеспечить кого-либо, чем-либо | |
| to explain to – объяснять кому-либо | |

He **was listened to** with great attention. Его слушали с большим вниманием

The use of computers

Just as television has extended human sight across the barriers of time and distance, so the computers extend the power of the human mind across the existing barriers.

They save a lot of time. They seldom make mistakes. It's much faster and easier to surf the Internet than to go to the library.

In the last 10 years or so, most large businesses have become completely depended on computers for storing and looking an information, for writing and calculating financial and mathematical information.

Computers within a single office or building may be connected, and they there fore form a network. Users of computers on a network can send messages to each other utilizing the same collections of data or information. In many offices and organizations computer message have replaced messages written on paper, and they are now called e-mail or electronic mail.

E-mail is a great invention, too. It's faster than sending a letter and cheaper than sending a telegram.

E-mail saves paper and the work of moving paper from one place to another. Workers can send and receive e-mail without leaving their desks and their desktop computers. But computers have some disadvantages. Computers can get viruses. Sometimes the wrong people can make use of the information available in the wrong way. Computers become out of date very quickly, they need to be replaced.

Words and word combinations:

to extend-продлевать, расширять

existing-существование

within-в пределах

to utilize-использовать, перерабатывать

to replace-ставить, заменять

2. Give the English equivalents for:

Расширять способности человеческого мозга, существующие барьеры, экономить время, делать ошибки, полностью зависит от компьютера, просматривать информацию, посылать сообщения, заменять сообщения, великое изобретение, не покидая своего места, посылать и получать электронную почту, использовать информацию неправильно, устаревать, нуждаться в замене.

3. Answer the questions:

1. What advantages of computer do you know?

2. Why have most large businesses become completely depended on computers?
3. How do we use the e-mail?
4. What disadvantages of computers do you know?

Computers at school

Information science with the ideas and message of processing and storing information is of great importance today. That's why computer technology must be told in secondary school. The new subject "basic information science", and "computing machine" was introduced for the first forms at schools. The pupils teach computers to resolve school problems. Contact with the machine increases the interest in learning, makes them more serious about studying new subject. School computers are used not only for studying information science, but also examinations purposes. Young people who finish the school must be trained to operate computers.

Words and word combinations:

a message of processing-средство обработки
 a storing of information-собрание информации
 to introduce-вводить
 to use-использовать
 to increase-увеличивать
 a purpose-намерение, цель
 to train-обучать

1. Give the English equivalents for:

Информационная наука, средство развития, компьютерная технология, стимулировать интерес к обучению, делать более серьезным обучение новым предметам, для изучения информатики.

2. Answer the questions:

1. Why is information science very important today?
2. Why do the pupils teach the computers at school?
3. What increases the interest of learning?
4. Where are school computers used?

Albert Einstein: the Greatest Scientist of the 20th Century

Not many people really deserve the title "genius" but Albert Einstein ['aɪnstain] was one of them. His discoveries ___1___ we understand our world today. Albert Einstein was born in Germany in 1879. He was a very slow learner at first. He even had trouble learning to speak! His parents were really worried. As a boy, Albert Einstein was very unhappy at school. His teachers treated him badly ___2___. His marks were usually bad.

In 1896 Albert went to Zurich to study at one of the best technical universities. There his abilities ___3___ began to show. After he graduated in 1902, Einstein took a job at the Swiss Patent Office. 1905 was his "Miracle Year", as he published three important essays including one on the "Special Theory of Relativity". Later Einstein wrote "The Theory of Gravity" and "The General Theory of Relativity". Soon he became ___4___.

In 1914 Einstein moved back to Berlin. In 1921 Einstein was awarded ___5___, and modestly travelled third class to Stockholm to receive it. He used his influence to lecture around Europe

and the USA to promote world peace. Soon the Nazis came to power in Germany. So in 1933 he had to go to America ____6____. He died on April 18th, 1955 in New Jersey, leaving behind a new way for us to look at the world.

3. Read the text «Isaak Newton» and complete the table.

Isaak Newton

Sir Isaak Newton is a world-famous English scientist, who devoted his life to mathematics, physics, astronomy [as'tranami] and other sciences. Newton discovered the law of gravity and many other laws, he developed some very important scientific theories which helped people to understand and explain a lot of things about the physical world.

Isaak Newton was born in a small village in the east of England in 1642. At school he was interested in mathematics, which he studied later at Cambridge University. In 1655 Newton received his degree and returned home where he did much of his most important work. Here, among other things, he studied optics. His experiments [ik speriments] showed that white light was a mixture of all colours of the rainbow. Many people had seen the colours of the rainbow before but it was Newton who explained that white light was made of those colours. Newton's studies of light led him to build the first reflecting telescope [tehskaupl. Newton also first thought about the law of gravity. The legend says that he discovered this law when an apple fell on his head while he was sitting under a tree in his garden. That's why in many pictures Newton was often shown with an apple in his hand.

Newton understood that the same kind of power that made apples fall from trees also gives objects weight and keeps planets on their orbits. Newton's discoveries are still important for modern science. For example, by studying the spectrum of light from a star scientists can find out what it is made of.

Newton took part in the political life of England and was a member of English Parliament. He didn't have a family and devoted all his life to science. Newton died in 1727 and was buried in

Westminster Abbey where there is a monument to this great man. Many scientists all over the world admire his talent and consider him to be the greatest genius in the history of mankind.
